

Experience

2024-05 **Software Developer** BG Automotive

Present

- Implemented stateless, secure authentication using JWTs stored in HTTP-only cookies, with access and refresh token rotation for session management.
- Implemented HTTP middleware in Rust using Redis as an intermediary cache layer, Server-Sent Events, and frontend Virtualization/Windowing to handle payloads 600 times larger.
- Developed a silent background process that monitors key presses and recognizes barcode syntax, triggering image capture from the warehouse CCTV system.
- Applied systems programming concepts, including mutex-based synchronization, to prevent race conditions and manage concurrent write operations.
- Used `cron`, the GNU `coreutils`, and `git` to create an automated deployment pipeline for various automated services.
- Deployed 10 containerized cloud applications optimized for resource efficiency, achieving reliable operation on a single low-tier cloud instance.

2024-03 **Volunteer Data Assistant** Bath Royal Literary and Scientific Institution

2024-05

- Used text-manipulation tools from the GNU `coreutils` such as `awk` and `sed` to process and clean existing tabular data.
- Interfaced with the `xlswriter` C library to programmatically generate non-trivial excel spreadsheets, such as spawning charts and extracting/including VBA macros.

Projects

Structure-Preserving Encryption and Decryption [johanyim/spead](https://github.com/johanyim/spead)

- Improved user experience by enforcing command-line flag validation to prevent misuse.
- Distributed CPU-bound parallel workloads to several threads to reduce the amount of time taken to encrypt and decrypt.
- Measured the performance using benchmarks using the criterion crate writing performance tests
- Implements a module for response caching, which can be used in a variety of related projects

Education

2019-09 **Computer Science MComp (Hons)** University of Bath

2023-05

Degree Class awarded: 2:1 - Functional Programming (82%) - Machine Learning (77%) - Statistics for Data Science (73%) - Cryptography (78%) - Data Structures and Algorithms (82%) - Computer Systems Architecture (82%)

2017-09 **International Baccalaureate (iB)** King George V School

2019-05

39 points overall - HL Maths (7) - HL Physics (7) - HL Computing (5)
